

Carbon Free Construction.

**Our Mission:
To Be The Partner Of
Choice In Carbon Free
Construction.**

This is Who we are

Mission and values

If you take sleep out of your life, work is more than half of your life. If your job sucks, your life sucks. At MYNT we believe that Innovation, Truth and Kindness matter. It has been proven time and time again in business, that a committed group of innovative individuals that care about each other, can revolutionise an industry.

Innovate

New ideas are the only things that deliver genuine growth to any business. What got us here won't get us there. If you have an idea, speak up. If you hear an idea speak up.

Collaborate

All of us are better than any of us. We will only go fast, and we will only go far, if we agree to go together.

Participate

Work hard, speak up, grow yourself and others. Learning is forever at MYNT for all of us. A hard working team that is committed to continuous improvement is a force to be reckoned with.

No Box 3's

Our values are not negotiable. No toxic people.

Burn The Org Chart

The person closest to the customer at the time, is the boss. Put your ego in the bin. There is no I in MYNT, and that wasn't accidental.

No Is Not An Option

Every time you talk to a customer, tell yourself, this is the last phone call this person will need to make, in order for their problem to be solved

Nobody Left Behind

Be safe, keep your mates safe and never forget this is a dangerous place. We go home safe to our families, full stop. Secondly, don't come here to retire. Everyone at MYNT grows a little every day.

No Sacred Cows

The easiest thing to sell is the truth. Denial leads to lies, and lies destroy innovation. Open, honest feedback, always.

Lift All Boats

We are part of an ecosystem. Never forget this. Without giving back to our staff, our customers, our suppliers, our community and our industry, there is no MYNT.

The Leeroy Jenkins Rule

Never forget where we came from. Go hard, grow, learn, teach, and don't be afraid to break it a little. We are brave, we are kind and we believe work can be fun.

WHAT WE MUST DO

WHAT WE MUST BELIEVE

WHAT WE MUST STAND FOR

I AM A
LEADER!

WE ARE
A TEAM!

CUSTOMER
FIRST
ALWAYS!

Pessimism Is Lazy

Stay Away From Pessimists

They're lazy and contagious. Of course something is going to go wrong with something at some point in the future, genius. The most optimistic person in the room is usually the hardest worker. It takes effort to believe in yourself, your ideas and your team

Independent Expertise

We employ industry leading experts in power, renewables, distribution, and fuel. We then give those experts the freedom to use, develop or build whatever solution delivers the best value outcomes for our customers. MYNT is completely agnostic to technology and engine manufacturers. Our expert teams brief is to treat your job like it's our job and stay focused on thinking beyond the drill and ensuring we deliver the best value hole.

Scale And Responsiveness

Our customers want the responsiveness and ease of interaction that comes from dealing with a private company, but the commercial and risk mitigation benefits of a corporation. With 150 staff across 14 branches, and a commitment to staff engagement, MYNT offers the heart of a privateer, the muscle of a corporateer and the mindset of an engineer. Our commitment to our customers is to be the easiest supplier to engage within our industry, delivering peace of mind and confidence that MYNT will deliver consistent quality, safety and best value outcomes.

Supply Chain Integrity

We own all our brands and most of our products back to bare metal. From design to delivery, servicing and even refuelling, MYNT has control over the entire service delivery chain. Our sales team is a circular reference between our business and our customer, ensuring any and all opportunities to innovate or improve any aspect of our supply chain is implemented across the board. Not only does our supply chain integrity deliver confidence to our customers, it has also been the source of many of our innovations and process improvements, with customers regularly suggesting ideas and initiatives that end up becoming part of our broader service offering.

**We own our
supply chain.
So your job **never**
stops**

Sales Range

Purple Pod

Built specifically to deliver renewable energy in tight spaces, the Purple Pod range delivers solar and battery energy, supported by fuel optimised diesel in one compact package.

Purple Pods can be delivered and deployed rapidly, and are designed to deliver plug and play energy and can also receive extra solar energy input from roof or ground mount modules that plug directly into the unit.

Purple Cube

The heart of the MYNT Purple Eco system, the Purple Cube is a state of the art energy storage system with multi voltage charge input capability.

This means the Purple Cube can receive energy from multiple sources concurrently, including diesel, mains, solar, wind or hydrogen. The Purple CUBE is perfect for customers who want to future proof their energy storage fleet, by enabling energy capture from whatever power source the end user has available on site.

Purple H2

MYNT Energy Tech was literally founded based on a belief that hydrogen is the likely eventual off highway renewable energy fuel of choice.

The Purple H2 unit is a diesel generator alternative, powered by the most fuel efficient Hydrogen fuel cell available on the market. MYNT employs experts in all aspects of design, supply, installation, certification, refuelling and technical support, representing an end to end hydrogen supply chain solution for customers looking for a renewable energy source that can deliver base load power.

Optimised Diesel

Remaining independent of engine manufacturers and employing industry leading experts is the key to enabling MYNT's value add strategy.

Our technical experts will size your generator correctly and they are free to offer the most efficient engine in that size range. With 90% of the cost of producing energy being fuel, this independence and technical expertise delivers best value outcomes in optimised diesel generator solutions.

Distribution Gear

The SUMO range of portable power distribution gear is quite simply the finest in the world.

Built using the highest quality, impact resistant, UV Stabilised polymer materials, SUMO manufactures in Australia and is in use in many of the harshest environments on Earth.

Fuel Tanks

The PIRATE range of mine spec fuel cells is designed to be ready to plug and play out of the box. Built to comply with the toughest mine regs, Pirate Smart Tanks deliver peace of mind and convenience for all fuel storage and dispensing applications.

Parts + Service

MYNT's commitment to sustainable value extends to after sales support. With a nationwide service network, MYNT can also provide parts, service spares, plugs and connectors and electrical spares for our entire range of generator, renewable, distribution and fuel storage products. We are in the business of providing power, so ensuring your job doesn't stop is the key to our success. Making sure our products are fully supported from cradle to grave is the number one reason customers come back and order our products again and again.

purple pod

Hybrid Generator + Solar

Taking the Purple Pod one step further, the + solar pod is ideal for applications that have high daytime loads and low night loads such as portable buildings. The solar system is designed to charge the battery during the day to enable the night load to operate on genuine renewable energy.

Benefits

- Small footprint
- Diesel/Solar/Battery in one
- Can add extra solar

Range (kW):

10 - 30

purple cube

Battery Storage

The Purple Cube delivers significant cost and carbon reduction benefits for construction, industrial, event and mining applications. From operating as a UPS to mitigate the need for spinning reserve, to removing the need for diesel altogether on some sites, the Purple Cube is a versatile, cost and carbon reduction powerhouse

Benefits

- Multi voltage charge input
- Can charge with solar, diesel, mains, wind or hydrogen

Rated Output (kW):

30 - 426

purple pod H₂

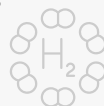

Hydrogen Generator

We are called MYNT Energy Tech for a reason. Whilst standby and intermittent loads can be ably handled by diesel, battery and solar solutions, the challenge lies in an effective, low emission solution for off grid base load power. The Purple H2 is the future replacement for portable diesel generators in many construction, mining and industrial applications.

Benefits

- ZERO Emissions
- Suitable for base load applications
- Most fuel efficient H₂ product on market

Range (kW):

30 - 50

“Renewables That Stack”

For many intermittent load construction applications, it is now possible to introduce significant amounts of renewable energy and make it stack against traditional diesel alternatives. The key is a shift in thinking from peak load, to overall energy consumption. It's understanding the difference between kVA and Kilowatt Hours that drives the best value outcomes.

FT

Standby Generator

This is where a generator is only to be used in the event of blackout. The machine will run only a small amount of hours each year. Because of this, the main decision making factors for selecting a standby generator are; price and access to service and parts.

Benefits

- AMF Controller
- Plug and Play ATS
- Ready access to parts

Range (kVA):

10 - 1,650

FT

Stationary Generator

A stationary application is where the generator is the main source of power, but it will spend all or most of its life in one location. Over 90% of the cost of operating a generator is fuel, so FUCHTARDT FT Stationary generators are fitted with fuel efficient, reliable European and Japanese Engines and STAMFORD Alternators. FUCHTARDT FT Stationary machines, also come standard with Deep Sea brand controllers and individually earth leakage protected outlet kits, as well as emergency stop buttons and fork pocket skid bases.

Benefits

- Outlet Kit
- Fuel Efficient Engine
- Ready access to parts

Range (kVA):

10 - 1,650

FMP

Mobile Generators

FUCHTARDT's FMP Mobile series of generators come standard with a host of rental, construction and mining ready features, including bunded fork pocket skid base fuel tank, lockable battery isolators, centre lifts points, emergency stop, earth leakage protected outlet kits, fire extinguishers, and three way fuel valves for connection to external bulk fuel cells.

Benefits

- Long range bunded fuel tank
- Outlet Kit
- Heavy duty canopy

Range (kVA):

10 - 1,650

“Fuel It Up And Send It”

The FUCHTARDT range of diesel generators is designed with responsiveness and overall value delivery in mind. Whether you have a standby, stationary or mobile application in mind, MYNT carries a large range of FUCHTARDT Generators in stock that can be turned around same day.

XL

Mobile Generators

XL is the workhorse of the Aston Electric Range. Bulletproof, efficient, reliable, and flexible, the robust simplicity of the XL Range makes it the generator of choice for serious fleet owners. With unrivalled fuel efficiency and proven reliability in the harshest conditions on Earth.

Benefits

- Ultra-heavy duty design
- Fuel optimised
- Mine spec standard

Range (kVA):

13 - 800

XL BT

Mobile, Big Tank

The XL Big Tank range also includes a bundled long range fuel tank base. With 48 hours autonomy, the XL Big Tank Range offers long range refuelling intervals on construction, industrial, event and mining sites where uptime is paramount.

Benefits

- Ultra-heavy duty design
- Fuel optimised
- Long range fuel tank

Range (kVA):

13 - 220

WH

Ultra Silent

Most fleet owners who experience the true sound suppression capability of the Aston Electric Whisper Series of generators for the first time are dumbfounded. With sound levels as low as 50dba, Aston Electric Whisper Series Generators deliver industry leading sound suppression for noise sensitive sites and applications.

Benefits

- Ultra-heavy duty design
- Fuel optimised
- Unrivalled sound suppression

Range (kVA):

25 - 150

WH BT

Ultra Silent, Big Tank

Combining the best of the best in the Aston Range, the Whisper Big Tank Series of generators are efficient, silent, autonomous, reliable, and unbreakable. Fleet owners who carry the Aston Electric Whisper Big Tank series describe them as quite simply, the best generators in the world.

Benefits

- Ultra-heavy duty design
- Fuel optimised
- Ultra silent and long range tank

Range (kVA):

25 - 60

ASTON ELECTRIC

“For Serious Fleet Owners”

We have been doing off grid power for a long time. The Aston Electric range of ultra-heavy duty, fuel optimised diesel generators is the accumulation of two decades of experience in understanding the true long term power value drivers. Fuel efficiency, noise reduction and robust design make Aston Electric the obvious choice for any fleet owner that takes a long term, cradle to grave best value view of their power assets.

XL
25

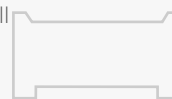

Half Squat (Handheld Range)

The SUMO handhelds are an ideal, lightweight toolbox companion and are available in a variety of single and three phase outlet combinations.

Benefits

- Three phase and single phase models
- Robust but lightweight shell
- The most compact IP66 rated DB on the market

Range (Amp):

10 - 32

Jumbo (Mid Range Distribution)

The SUMO Jumbo is a market leading stackable ACS Distribution Board. Stacking 12 to a pallet, SUMO Jumbo's innovative design reduced freight and storage costs by up to 80% when compared to similar products on the market, and are fully compliant to AS/NZS 61439.4 and AS/NZS 3012

Benefits

- Stackable - 12 To a Pallet
- Daisy Chainable
- No Captive Parts

Range (Amp):

32 - 63

Super Jumbo (Trolley Mount)

The SUMO Super Jumbo is the largest of the SUMO Series Distribution Boards and ideal for cascading to other DB's from your main source of power.

Benefits

- Trolley mount
- Soft ground stabilisers
- Easy access for maintenance

Range (Amp):

250 - 1,000

“Stack up the Savings”

SUMO transports energy safely around your site. The SUMO Plug N Play range of portable distribution boards range from 4 outlet hand held units to 1,000 amp site master boards. All SUMO Products are certified to Australian standards and constitute a cascable ecosystem of convenient and compact power distribution solutions.

Lift and Shift (Transportable Full)

PIRATE Smart Tanks Lift & Shift range is built and certified to be transported whilst containing liquid. Lift & Shift Tanks are approved for the transport of dangerous goods and can be moved around site by cranes, trucks and forklifts without the need to decant.

Benefits

- Baffled
- 110% Bunded
- Moveable Full

Range (L):

1K - 6K

Static Storage (Larger Applications)

The PIRATE Smart Tank Static Storage range is the ultimate bulk storage fuel solution for Mining, Industrial, Construction and Rental applications. From 8kl to 100kl, Pirate Static Storage tanks have certified lift points for crane lifting and are fully bunded and mine spec compliant.

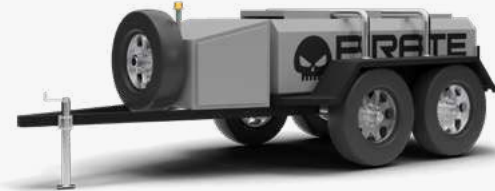

Benefits

- Fully Bunded
- Containerised
- Mine Spec

Rated Output (L):

10K - 75K

Tow Tanks (Registered)

For a cost effective site refuelling solution, PIRATE Tow Tanks are available in 1kl and 2kl configurations. With a range of pump, bowser and smart tracking solutions, PIRATE Tow Tanks offer rapid light vehicle and machinery refuelling that can be done in house by your own maintenance team.

Benefits

- Fully Towable
- Registered
- Fully Bunded

Range (L):

1K - 2K

“Safety First Smart Tanks”

The PIRATE range of mine spec fuel cells are designed to be ready to plug and play out of the box. Built to comply with the toughest mine regs, PIRATE Smart Tanks deliver peace of mind and convenience for all fuel storage and dispensing applications.

Community Partnerships

MYNT Energy Tech is committed to extending our commitment to sustainability beyond just the products we sell.

We believe that we are a part of an ecosystem. Our broader community is a crucial part of that ecosystem, and we ensure we are continually involved in multiple projects that deliver value back into the community that makes our business possible.

Community **Partner**

LIONS FC

Official Sponsor of the LIONS FC

MYNT is the proud renewable energy partner of Lions FC Brisbane. Lions FC has a strong focus on grass roots football and developing future players to ensure the sustainability of the club and the game in general. Our partnership with Lions FC is one of our proudest community endeavours, with the cultures of both organisations being so aligned.

Community **Partner**

STRONGER FOR LONGER

MYNT is a proud supporter of the Stronger for Longer charity

Stronger for Longer raises money to support the QUT Prostate Cancer Research team that develops treatments that deliver a better quality of life for men living with prostate cancer. MYNT's marketing and strategy team worked closely with the Stronger for Longer board to develop the brand and marketing material from scratch. It is one of the most rewarding experiences the MYNT team has been a part of to date.

Community **Partner**

Zambia Medical

MYNT is a proudly supporting Dr Shylet Sitima in her mission

to deliver education, skills and medical facilities for disadvantaged communities in Zambia. MYNT is assisting in delivering power products, marketing and strategic fund raising advice to Dr Sitima. This will include developing branding, websites, social media campaigns as well as physical power generation equipment to remote Zambian communities.

Safety First Always

MYNT is a purely B2B power supplier. Our customers demand the highest level of safety and quality. With products in every state of Australia, operating in compliance with the highest safety standards, MYNT personnel and equipment have safety built into their DNA. MYNT prides itself on building long term relationships with staff, suppliers, and customers. Our commitment to ensuring safety and that people come first is not negotiable, this plays a critical role in the development of those relationships.”. Quite simply, if it cannot be done safely, it won’t be done at MYNT.
